

Women & Leadership

Over the years, the Northern TUC Women’s Group has identified a need to empower women into leadership.

Working with Trade Union Education there is an exciting opportunity for women to further develop their skills and knowledge and progress through our Women & Leadership Course.

The course will equip learners with the core skills and understanding to deal with leadership responsibilities, building confidence and providing opportunities to develop strategic approaches in an ever changing environment.

This will be achieved through a combination of individual, group discussion and academic work on a two day course at the Northern TUC office and a two day visit to the European Parliament in Brussels. There will also be a one day recap and future planning session.
