

UNITE the union, the NUT and Prospect
are working together with the South West TUC to promote:

We are launching a pilot project to encourage women to choose Science, Technology, Engineering and Maths (STEM) related careers.

Can you help us?

Women members - if you work in STEM related jobs could you:

- give a presentation to students in school?
- welcome students into your workplace to showcase STEM careers?

Teachers - would you be interested to take part and:

- invite women into school to give presentations to students?
- arrange for groups of students to visit workplaces?

If so, please email us at: southwestwomen@tuc.org.uk

Please tell us if you are a teacher or a member and your role at work.

See: www.nwed.org.uk for further information about National Women in Engineering Day
